

## DATA ABOUT YOUR STUDENTS AND ALUMNI/AE

We believe that it is important to have as much information as possible to share with you, employers, and your students about the career choices available to those in your discipline.

### ■ *Post-Graduation Career Plans and Summer Employment Surveys*

Every year Career Services surveys new graduates, of both undergraduate and graduate programs, to find out what they are doing after graduation: where they are working, where they are in graduate or professional school, if they are traveling -- whatever they may be doing. Information is reported for every discipline.

In addition to our post-graduate surveys, counselors in the four undergraduate schools survey students on their summer employment/activity, and we glean a great deal of information about interesting internships and summer options.

The results of our surveys are posted on our Web site by school:

<http://www.vpul.upenn.edu/careerservices>

### ■ *Penn Career Network (alumni/ae career mentors)*

The Penn Career Network (PCN) is a database of over 3000 Penn graduates who have volunteered to answer career-related questions for Penn students and alumni/ae. PCN advisors can provide a wealth of information on career fields and employment outlooks. The database is searchable on a number of criteria, including discipline, so you and your students can see what some of your graduates are currently doing.

The Penn Career Network can be found at:
