## Methodology

Students were asked via several email requests during Spring 2014 to complete an online version of the Career Plans Survey. Follow-up emails were sent and phone calls made between May and November 2014 to those students who had not responded or had previously indicated they were “still seeking.” Additional follow-up was done by checking LinkedIn profiles and then confirming the status of what was found there either by phone call or email. Only information individually verified by the student was included in the response rate.

A total of 1,230 responses were received, resulting in an 81% response rate.
