**Methodology**

Students were asked via several e-mail requests during Spring 2016 to complete an online version of the Career Plans Survey. Follow-up emails were sent and phone calls were made between May and November 2016 to those students who had not responded or had previously indicated they were “still seeking.” Additional follow-up was done by checking LinkedIn profiles and then confirming the status of what was found there either by phone call or email. Only information individually verified by the student was included in the response rate.

A total of 1,251 responses were received of 1,594 degrees awarded, resulting in an 79% response rate.
