Alternative Careers For Nurses

Communications

This rapidly expanding area has several components. Some public relations firms offer communication services solely to the health care industry. Their products include press packages, corporate brochures and videos, patient education materials, and special events planning. Other firms provide science information services such as databases, indexing, and abstracting. Also in this category are publishers of medical and scientific textbooks. This is a great area for people with both science and English/Communication backgrounds.

Recent positions taken by nursing graduates:

Editor and Corporate Director

Job Titles:

Marketing and sales representative; production or program assistant; editor; talk show host; health care columnist; health researcher in radio/television; medical illustrator; technical writer/illustrator

Requirements:

Excellent presentation, writing, editing and analytical skills; demonstration of abilities through samples of work; experience as an unpaid intern and paid work in an area of specialty

Education

There are teaching and administrative positions available in elementary, secondary and higher education. Requirements vary depending on the position and the setting. Please see job titles and requirements below for further information.

Positions taken by recent nursing graduates:

Lecturer; Teaching Assistant; Assistant Professor; Clinical Instructor; Research Assistant Professor

Job Titles:
School of nursing faculty member; nursing school administrator; secondary school science/math teacher; preschool/elementary teacher; coach or trainer; special health programs teacher; counselor; drug and alcohol counselor; special programs administrator; science museum educator; school teen hotline facilitator

Requirements:

Certification is required for public school teachers. Non-certified graduates can teach in independent schools and charter schools, as well as some public schools with alternative certification programs (such as Philadelphia and New York City). Programs such as Teach for America, Urban Teaching Fellows Program, and Teach Philadelphia provide structured one- two year teaching programs for those without certification. The Peace Corps and many other programs offer international volunteer teaching assignments. Schools of nursing sometimes hire Master's prepared nurses with clinical or teaching experience as faculty members. Many administrative positions within higher education require a master's degree.

Government

The U.S. Office of Personnel Management groups nursing and other health care opportunities into the Medical, Dental, Public Health job category. While there are many opportunities at the federal level, more opportunities exist at the state and local levels. Competition is fierce for many positions. To increase opportunities for new employees, the government has created several internship programs such as the Emerging Leaders Program referenced below.

Job Titles:

Prison health nurse; Medicaid/Medicare program adviser; Peace Corps volunteer; political adviser

Requirements:

Patience and persistence in following formal guidelines; every level of government (local, state, federal) has specific procedures for applying; inquire about particular procedures for your area; some jobs require testing

Healthcare Consulting
Healthcare organizations (hospitals, drug companies, and labs) may bring in an outside organization to help them solve problems. Consultants address issues such as marketing plans, internal organization, quality assessment, or finance. The typical research associate or analyst collects data (from database and interviews), then analyzes and presents results or recommendations. A healthcare background and good analytical skills are useful. This is a booming field given the rapid changes in health care today.

**Positions taken by recent nursing graduates include:**

Business Analyst; Staff Consultant; Senior Consultant; Manager

**Job Titles:**

Research analyst; health care staff consultant; health care analyst; business analyst

**Requirements:**

Experience in research; analytical abilities; articulate, confident interpersonal style; knowledge of field in which consulting is required; orientation to business objectives

Law and Law Enforcement

According to the U.S. Bureau of Labor & Statistics, lawyers act as both advocates and advisors in our society. As advocates, they represent one of the parties in criminal and civil trials by presenting evidence and arguing in court to support their client. As advisors, lawyers counsel their clients concerning their legal rights and obligations and suggest particular courses of action in business and personal matters.

Job Titles:

Legal nurse consultant; legal researcher; litigation support consultant; forensics nurse; hospital general counsel; medical patent lawyer; regulatory expert.

Requirements:

Experience in research and analysis; interest in assisting attorneys, insurance companies and health care institutions with legal issues related to medical practices; experience or interest in combining clinical practice with law enforcement. For counsel and regulatory positions, a law degree and experience in health care or regulatory environment are essential.

Market Research/Health Policy Research

According to a survey of the Creative Group, market research positions are in highest demand in the pharmaceutical, biotech, and health care industries.

Job Titles:

Research assistant/associate; market researcher; health systems analyst; project manager

Requirements:

Interest in analyzing statistical data to determine market conditions; research and data analysis experience; interest and ability in preparation of written and verbal presentation of findings
Pharmaceutical, Biotech, and Medical Device Companies

Always a good source of research positions, consider these companies for business jobs as well. Sales is a common entry point. These jobs entail a significant education component, as the sales force is now a primary source of information on drugs and devices for clinicians. Other positions include public relations, technical writing, and business analyst.

Positions taken by recent nursing graduates include:

Medical Program Coordinator; Business Team Consultant; Clinical Data Associate; Clinical Research Scientist; Pharmaceutical Sales Representative

Job Titles:

Sales representative; marketing associate; clinical research associate; quality assurance assistant; quality control specialist; product development specialist; medical monitor; director of clinical protocols

Requirements:

Experience in sales; product knowledge or development experience; experience or education in marketing; patient assessment and interviewing skills; research experience (pharmaceutical companies often hire clinical research organizations to perform clinical trials; these organizations also offer potential employment for nurses).
