

International Internship Programs

Program	Description	Website
CDS International Internship Programs	<p>CDS International is dedicated to providing opportunities for American students and recent graduates to obtain professional experience abroad. Interning in Spain or Argentina through CDS is a chance to build your career, enhance language skills, and enjoy an intercultural experience that will impact your outlook on life. Internship placements are customized for each applicant and last up to 3 months. American participants may apply for financial assistance through the CDS International Scholarship Fund. Participants in the program in Argentina, which is administered in cooperation with partner organization COINED, may opt to combine a 1-month language course with a 2-month internship. CDS participants come from a wide range of backgrounds: Some studied Spanish but never had the opportunity to spend time abroad while others are study abroad alumni who want to deepen their understanding of culture and life in Spain or Argentina. Qualified candidates are interested in gaining intercultural insights abroad and implementing newly acquired global business practices upon their return home.</p>	<p>http://www.cdsintl.org/fromusa/</p>
