School of Engineering & Applied Science Summer Career Plans Survey Class of 2006 Overview

Each year the Career Services office surveys the Penn Engineering students to gather information about their summer work experience. This year the students scheduled to graduate in December 2005, May and August 2006 participated in the survey. Forms were distributed to all seniors attending On-Campus Recruiting Orientation sessions in September 2005. Responses were also collected online. Those who did not complete the form received a second copy from the Academic Programs Office in November. This resulted in a 89% response rate. 316 students completed the survey of the 355 eligible.

92.4% of the respondents provided us with detailed information about their employment during the summer of 2005, 2.2% were taking classes, 2.2% traveled and 3.2% did not indicate their status. 80% of the students who were employed provided their salaries. The overall average salary of the respondents was \$2,935 per month.
