

University of Pennsylvania Career Services

School of Engineering & Applied Science Summer Career Plans Survey Class of 2008 Overview

Each year the Career Services office surveys the Penn Engineering students to gather information about their summer work experience. This year the students scheduled to graduate in December 2007, May and August 2008 participated in the survey. Forms were distributed to all seniors attending On-Campus Recruiting Orientation sessions in September 2007. Responses were also collected online. Those who did not complete the form received a second copy from the Academic Programs Office in November. This resulted in a 92.5% response rate. 323 students completed the survey of the 349 eligible.

The top industries in which students accepted internships included manufacturing, financial services, and the non-profit/higher education sector. Within the manufacturing sector, the largest percentages of internships were in biomedical products, pharmaceuticals, consumer products, and electronics/robotics, respectively. The number of students participating in internships abroad rose 4%, a strong indicator of students' continued interest to gain experience outside of the United States. The overall average salary of the respondents who were employed full-time was \$3,569 per month, a 10.5% increase from last year.

Summer Plans
