School of Engineering & Applied Science Summer Career Plans Survey Class of 2010 Overview

Each year the Career Services office surveys the Penn Engineering students to gather information about their summer work experience. This year the students scheduled to graduate in December 2009, May and August 2010 participated in the survey. In August and October emails were sent to our listservs requesting students complete the on-line survey. In December 2009 and February 2010, personalized emails were sent to each student who had not yet responded. This resulted in an 87.5% response rate. 314 students completed the survey of the 359 eligible.

Similar to last year, the top sectors in which students accepted internships included manufacturing, financial services, and higher education. Within the manufacturing sector, the largest percentages of internships were in consumer products, aerospace, computer hardware and pharmaceuticals. 30% of the students accepted engineering jobs and of that group 66% had positions in research and development. This reflected a 4% increase over last year. Of those students reporting the date they received the offer they accepted, 42% were committed to a position prior to March 2009 and 53% accepted their position between March and May 2009. The overall average salary of the respondents who were employed full-time was \$3,470 per month and for those employed part-time it was \$1,451.
