

Wharton Undergraduate Class of 2008 Career Plans Survey Report

	<u>2008</u>
Number of Degrees Awarded	637
Number of Completed Surveys	548
Percentage Response	86%

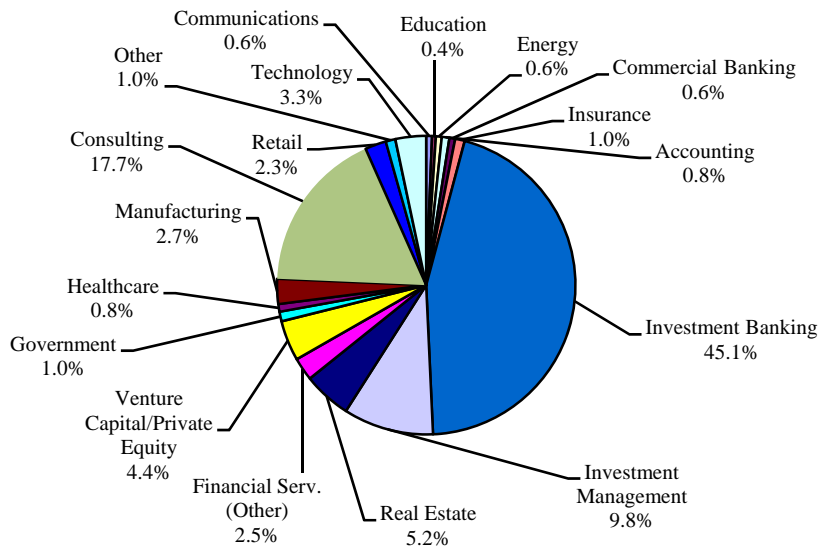

SUMMARY OF POST-GRADUATION PLANS

This report summarizes responses from December 2007 and May/August 2008 Wharton Bachelor of Science in Economics degree recipients. Wharton undergraduate students fared well in the job market, even though the economy started to slow during the latter part of the year. Over 88% of the respondents entered the job force after graduation, with the vast majority of students receiving their offers before December 2007.

There was an increase in the number of students planning to enter graduate school over the previous year, with 4.2% enrolling and another 1.3% indicating they were seeking admission.

INDUSTRIES EMPLOYING WHARTON GRADUATES

Although Wharton students entered a variety of industries, financial services continued to be the most popular career choice in terms of industries. There was a slight decrease in the percentage of students accepting offers in investment banking, but an increase in those taking investment management offers.

More students in the Class of 2008 entered the manufacturing, retail and technology industries, while consulting saw a slight decrease.

METHODOLOGY

Students were asked via several e-mail requests during Spring 2008 to complete an online version of the Career Plans Survey. A follow-up survey was mailed in July 2008 to those students who had not responded or had previously indicated they were “still seeking.” A total of 548 surveys were returned, resulting in an 86% response rate.
