

Wharton Undergraduate Class of 2009 Career Plans Survey Report

2009

Number of Degrees Awarded	622
Number of Completed Surveys	532
Percentage Response	86%

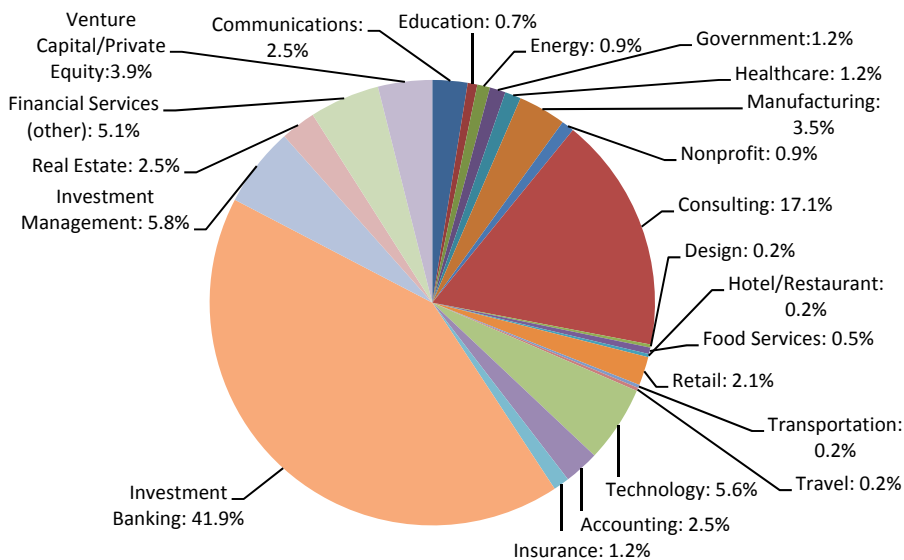

SUMMARY OF POST-GRADUATION PLANS

This report summarizes responses from December 2008 and May/August 2009 Wharton Bachelor of Science in Economics degree recipients. Given an increasingly difficult job market, Wharton undergraduate students fared relatively well. Over 82% of survey respondents entered the job force after graduation with the vast majority of students receiving their offers before December 2008.

The percentage of students planning to enroll in graduate school continued to increase, with 6.6% of survey respondents enrolling and another 0.4% seeking enrollment.

INDUSTRIES EMPLOYING WHARTON GRADUATES

Wharton undergraduates entered a wide array of industries in 2009; however, financial services continued to be the most popular industry choice. While students accepted fewer offers in investment banking and investment management this year, the majority of the class continued to accept offers in financial services despite the economic downturn.

Consulting offers accepted in 2009 (17.1%) were fairly comparable to 2008 (17.7%). Some students elected to enter other industries - technology, communications and accounting saw the biggest increases in 2009.

METHODOLOGY

Students were asked via several email requests during Spring 2009 to complete an online version of the Career Plans Survey. A follow-up survey was mailed in July 2009 to those students who had not responded or had previously indicated they were “still seeking.” A total of 532 surveys were returned, resulting in an 86% response rate. Responses include data collected as of August 2009.
