

Wharton Undergraduate Class of 2006 Career Plans Survey Report

	<u>2006</u>
Number of Degrees Awarded	623
Number of Completed Surveys	504
Percentage Response	81%

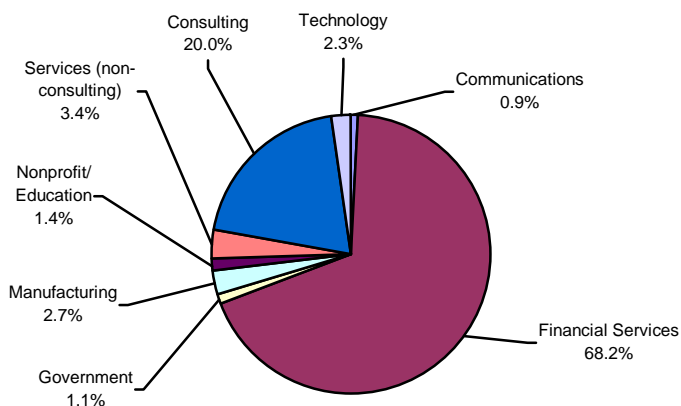

SUMMARY OF POST-GRADUATION PLANS

This report summarizes responses from December 2005 and May/August 2006 Wharton Bachelor of Science in Economics degree recipients.

The economy continued to improve this year, bringing an increase in the number of employers visiting campus to conduct information sessions and interviews. Over 85% of the survey respondents reported that they were employed full-time, with most respondents receiving their job offer before or during the fall semester. There was a substantial increase in the average base salary from \$53,999 in 2005 to \$57,784 in 2006. For those with other plans, 3.8% of the survey respondents enrolled in graduate school.

INDUSTRIES EMPLOYING WHARTON GRADUATES

The financial services industry continued to be the most popular career choice for Wharton students. Within the financial services industry, there was a significant increase in students accepting private equity / venture capital positions, from 1.2% in 2005 to 7.7% in 2006. Consulting continues to place second in terms of career choice, although there was a slight dip from 2005.

The percentages of students entering the communications, government, manufacturing, non-profit, technology and service (non-consulting) industries are roughly the same, with slight increases or decreases, compared to 2005.

METHODOLOGY

Students were asked via several e-mail requests during Spring 2006 to complete an online version of the Career Plans Survey. A follow-up survey was mailed in July 2006 to those students who had not responded or had previously indicated they were “still seeking.” A total of 504 surveys were returned, resulting in an 81% response rate.
