

Wharton Undergraduate Class of 2007

Career Plans Survey Report

	<u>2007</u>
Number of Degrees Awarded	598
Number of Completed Surveys	506
Percentage Response	85%

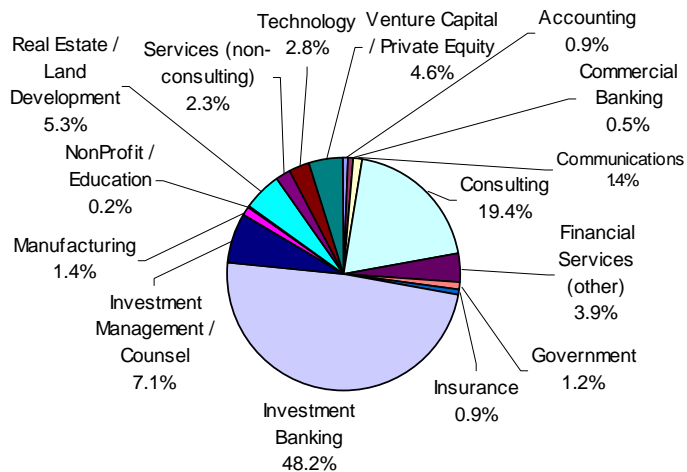

SUMMARY OF POST-GRADUATION PLANS

This report summarizes responses from December 2006, May 2007 and August 2007 Wharton Bachelor of Science in Economics degree recipients.

This year's economy remained strong with continued increase in the number of employers recruiting on campus through information sessions and job interviews. Over 85% of survey respondents reported that they were employed full-time, with most respondents receiving their job offer before or during the fall semester. There was a significant increase in the average base salary from \$57,784 in 2006 to \$59,960 in 2007. Nearly 3% of survey respondents enrolled in graduate school full-time.

INDUSTRIES EMPLOYING WHARTON GRADUATES

Investment banking was the most popular career choice for Wharton students – just under 50% entered the industry in 2007. Consulting attracted the second-largest group of Wharton students in 2007 although there was a slight decrease from 2006. Other popular industry choices this year included investment management/counsel, real estate/land development and venture capital/private equity.

The percentages of students entering the communications, government and technology industries are roughly the same as 2006 while there was a decrease in percentage of students entering manufacturing, services (non-consulting), and nonprofit/education compared to 2006.

METHODOLOGY

Students were asked via several email requests during Spring 2007 to complete an online version of the Career Plans Survey. A follow-up survey was mailed in July 2007 to those students who had not responded or had previously indicated they were “still seeking.” A total of 506 surveys were returned, resulting in an 85% response rate.
