

Wharton Undergraduate Class of 2016 Career Plans Survey Report

METHODOLOGY

Students were asked through several e-mail requests and follow-up phone calls to complete an online Career Plans Survey. Follow-up emails (along with phone calls) were sent between July – September 2016 to students who had not responded or who previously indicated they were “still seeking.” A total of 498 students completed surveys out of 656 graduates, resulting in a 76% response rate.

AVERAGE ANNUAL BASE SALARIES TREND

INDUSTRIES OF EMPLOYED GRADUATES

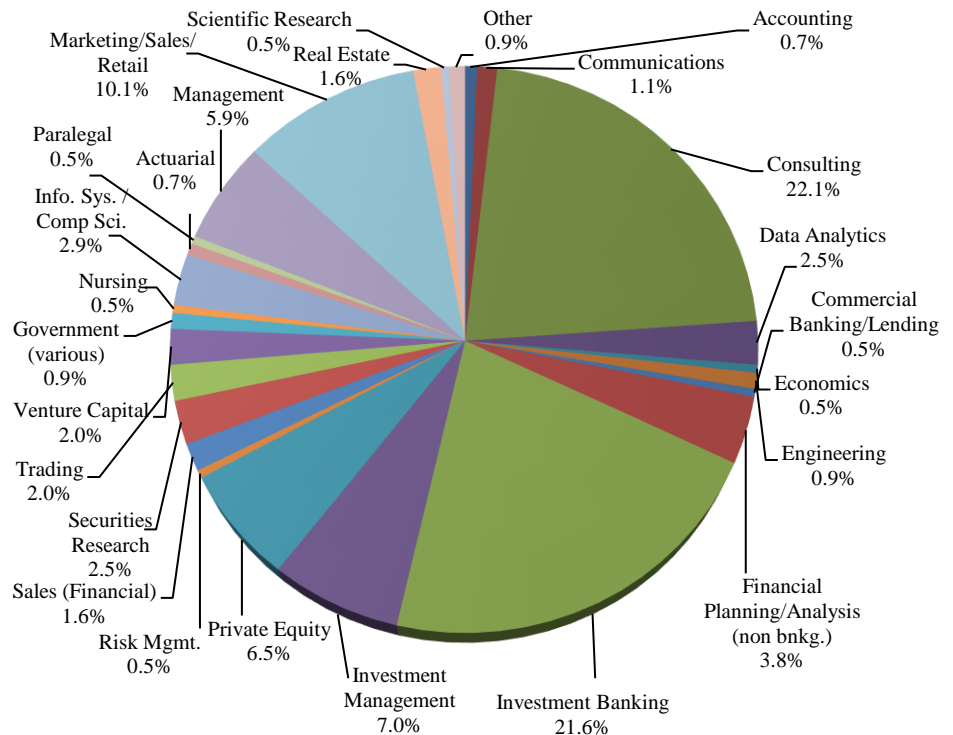

More members of the Class of 2016 opted to continue their education immediately after graduation (5.8% as opposed to 3.1% in 2015), reversing a downward trend since the end of the recession.

Fewer students entered the investment banking industry (27.6% as opposed to 35.3% in 2015) and we continued to see an increase in the number students entering the technology industry, ranging from start-ups to large corporations such as Microsoft and Google. Consulting remained another strong choice with over 20.7% of students selecting it, although this was down from 22% in 2015.

JOB FUNCTIONS OF EMPLOYED GRADUATES

Unlike previous years, fewer than half of the members of the Wharton Class of 2016 entered a financial job function, with the popularity of investment banking roles declining to 21.6% from 26.8% in 2015. The percentage of students entering trading also declined to 2% from 4.1% in 2015.

A new job function, data analytics, was added to the survey this year, and 2.5% of students reported accepting jobs in this area. Insurance positions were in general less popular, with the percentage of students accepting actuarial positions falling to 0.7% from 1.9% in 2015. More students accepted positions in marketing, sales, and retail functions which increased to 10.1% from 7.5% in 2015.
