

METHODOLOGY

Students were asked through several e-mail requests and follow-up phone calls to complete an online Career Plans Survey. Follow-up emails and phone calls were sent between July and September 2017 to students who had not responded or who previously indicated they were “still seeking.” Plans were obtained for a total of 548 students out of 636 graduates. Of these, 511 filled out the survey and/or confirmed their information with Career Services, resulting in an 80% “response rate”. Data for an additional 37 graduates was verified via LinkedIn research, resulting in an 86% “knowledge rate.”

INDUSTRIES OF EMPLOYED GRADUATES

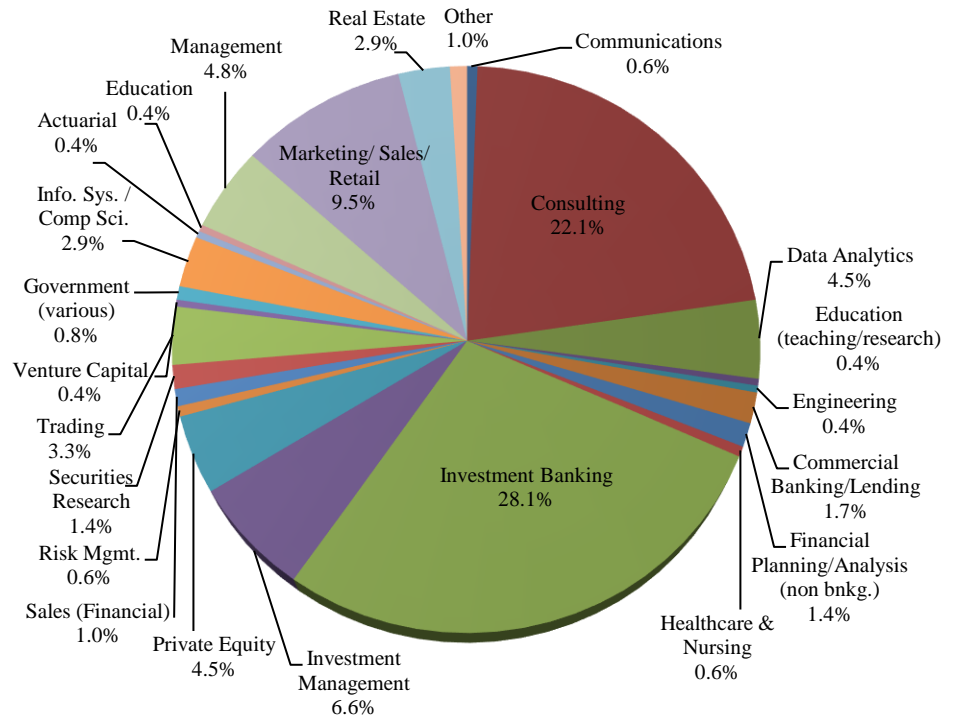

A vast majority of the Wharton Class of 2017 entered the workforce following graduation, with only 2% opting to pursue graduate school immediately.

We continued to see an increase in the percentage of students entering the technology field, as well as real estate, investment banking and hedge funds over the Class of 2016.

Fewer students entered the communications, venture capital, consulting and insurance industries as compared to the Class of 2016.

The average salary increased by about 4%.

JOB FUNCTIONS OF EMPLOYED GRADUATES

Slightly under half of students entered a financial job function, with the popularity of investment banking roles increasing this year, along with trading, real estate, and data analytics.

Less popular job functions this year includes private equity, securities research, and venture capital.

Consulting and marketing/sales/retail job functions remained popular as well with students from the Class of 2017.
